Profile Summary

Android and Flutter App Developer with hands-on experience in building real-world mobile applications. Worked on multiple client-based and personal projects across domains including Finance, Education, Communication, and AI-based applications. Strong focus on backend logic, Firebase integration, and scalable app architecture

Skills

- **Languages:** Java, Kotlin, Dart, JavaScript
- **Frameworks:** Android SDK, Flutter
- **Tools:** Android Studio, VS Code, Firebase, Git
- **Backend:** Firebase Firestore, Realtime Database
- **APIs:** REST APIs, Payment Gateways
- **Others:** App Deployment, Play Store Publishing, UI/UX Implementation

Work Experience

App Developer | Freelance   **Duration (2024 – Present)**

- Developed multiple Android apps using Android Studio for Finance, Education, and Gaming domains.
- Built cross-platform apps using Flutter for Android and Web.
- Integrated payment gateways, APIs, authentication, and databases.
- Published and maintained live applications on Play Store.
- Worked on AI-based app features and real-time communication apps.

Projects

AyoGram – Messaging & Community Platform (Personal Project)

- Designed and developed a chat-based platform with channel support (free & paid).
- Implemented user interaction features, role-based access, and automation logic.
- Focused on performance optimization, scalability, and clean UI/UX flows.
- Worked end-to-end as a full-stack developer from concept to execution.

Winzara — Mobile Application

- Built a production-ready mobile app with Firebase backend and real-time updates.
- Implemented wallet logic, VIP subscriptions, and rewarded ads monetization.
- Focused on stability, user flow, and live issue handling.

Education

Bachelor of Computer Applications (BCA)
Global Group of Institutes (PTU) | 2023 – 2026
